SUMMARY

Motivated full-stack web developer with a strong track record in designing, developing, and maintaining high-quality websites. I specialize in creating seamless customer experiences through platforms like Shopify and Amazon Seller Central, robust API design, and comprehensive front-end (HTML, CSS, JavaScript/Typescript/React) and back-end (NodeJS, Python, Java, Liquid) solutions. I also have experience hosting full-stack applications through various services and understand scalability and compute costs. Complementing my technical expertise is extensive electrical engineering experience in installations and maintenance. I'm committed to cross-platform optimization, mobile responsiveness, and staying ahead of web technology trends—all while delivering projects from concept to completion.

EXPERIENCE

Freelance Web Designer

Betterson Brands

📅 05/2023 - Present   📍 Calgary, AB

- Designed, developed, and maintained the company website, ensuring specific customer requirements were met and UI/UX was appealing, user-friendly, and responsive with optimal functionality.
- Customized brand content resulting in enhanced user engagement by integrating a headless CMS with Shopify.
- Successfully integrated various applications, including Amazon MCF, to establish connections between orders and inventory, promoting synchronization between new store and Amazon listings.
- Designed product launch Media & PPC campaigns, built influencer networking funnel to drive sales and foster company growth.
